REMARKS

This is UNEVALUATED Information

25X1

1. In early September 1954, concreting work was completed on the 2,200-meter-long runway at Tutow airfield. Work was under way on the taxiway at the two sides of which ear-shaped areas were being built.
2. In September, difficulties arose on the construction site because of a high ground water level. These difficulties were meanwhile overcome by a drainage system.
3. According to conversations held in late September, several buildings were to be constructed in 1954 and a new and unidentified location was examined for the construction of an ammunition dump.
4. According to official records, 568 men were employed at the field on 10 September and 564 men on 20 September.
